AUDIO VISUAL, LIGHTING & SOUND

Light & Sound - Light and sound services involve the design, installation, and operation of lighting and sound systems to enhance the atmosphere and experience of an event. This includes the strategic placement of lighting fixtures, control of lighting effects, and the configuration of sound systems to ensure optimal sound quality and distribution throughout the event venue.

Audiovisual - Audiovisual services encompass the setup and operation of audio and visual equipment for events. This includes sound systems, microphones, speakers, video screens, projectors, and lighting equipment. Audiovisual technicians handle the technical aspects of sound amplification, video display, and lighting design to create an immersive and engaging experience for event attendees.

STAGING, ROOFING SYSTEMS & RIGGING

Staging - Staging involves the design, setup, and construction of platforms or raised structures for events. These stages provide a focal point for performers, speakers, and presenters, ensuring they are visible to the audience. Staging can be customized to suit various event types and sizes, and it often includes elements such as steps, ramps, and backdrops.

Roofing Systems - Roofing systems for events provide protection from weather elements such as rain, sun, and wind. They are designed to cover outdoor event spaces, creating a sheltered area for attendees and equipment. These systems are usually temporary structures and can be tailored to fit the event space, accommodating different capacities and layouts.

Rigging - Rigging involves the setup and installation of various equipment, such as lighting fixtures, audio systems, and decorations, using specialized techniques and equipment. Rigging ensures that equipment is safely suspended or supported, allowing for optimal positioning and functionality during events. It requires expertise in engineering, safety standards, and load calculations.
